Coastal erosion and the archaeological assessment of an eroding shoreline at St Boniface Church, Papa Westray, Orkney is one of the most important Iron Age sites in the British Isles. The site is located on the north coast of Papa Westray, a small island in the Orkney Islands, Scotland. The site was excavated between 1973 and 1998, and the results of the excavation have been published in a number of reports and books.

The archaeological assessment of the site was conducted by Christopher Lowe and Sheila Boardman. The authors of the report, Coastal Erosion and the Archaeological Assessment of an Eroding Shoreline at St Boniface Church, Papa Westray, Orkney, provide a detailed account of the excavation and the archaeological results. The report includes an analysis of the archaeological findings, as well as a discussion of the environmental and coastal processes that have shaped the site.

The authors note that the site is located in a coastal environment that is subject to ongoing erosion. The archaeological remains at the site are therefore at risk of being lost due to coastal processes. The report provides a detailed analysis of the archaeological remains and their potential for preservation.

The authors also discuss the environmental and coastal processes that have shaped the site. They note that the site is located in a coastal environment that is subject to ongoing erosion. The archaeological remains at the site are therefore at risk of being lost due to coastal processes. The report provides a detailed analysis of the archaeological remains and their potential for preservation.

The report also provides a detailed account of the excavation and the archaeological results. The authors describe the methods used in the excavation, as well as the results of the analysis of the archaeological remains. The report includes a number of illustrations and photographs of the site and its archaeological remains.

Overall, the report provides a detailed account of the archaeological assessment of the site at St Boniface Church, Papa Westray, Orkney. The authors provide a detailed analysis of the archaeological remains and their potential for preservation, as well as a discussion of the environmental and coastal processes that have shaped the site.
