This is a digitally reprinted edition of Urban Space and Structures, first published in 1972. This first volume in the Cambridge Urban and Architectural Studies series offers a fresh perspective on the history and evolution of urban planning in the modern age. The book is divided into three parts: Part One covers the history and theory of urban planning, Part Two examines the social and economic context of urban planning, and Part Three explores the practical implementation of urban planning. Overall, the book provides a comprehensive overview of the field of urban planning and its role in shaping the modern city.
